

SAVING LIVES BY DESIGN

SNAP-IT™ / WRAP-IT™ REFLECTORS FROM SAFE-HIT

MAKE A DIFFERENCE IN ALL DIRECTIONS

OVERVIEW

Safe-Hit Snap-It and Wrap-It products are unique reflectors that attach with ease to practically any post or similar type product that needs quick and significant visual enhancement.

Snap-It and Wrap-It reflectors are exceptional at highlighting signs that may be partially obstructed by tree branches or other visual barriers. For delineator applications not requiring a rebounding post, use Snap-It reflectors on U-Channel posts instead of button reflectors for a more durable reflector with a much larger surface area.

Studies also show that as a growing aging population with less than perfect eyesight continues to drive at night, larger reflective surface areas are becoming more important.

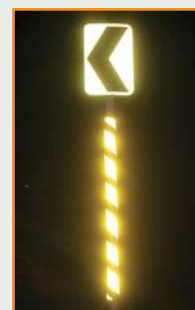

Snap-It reflectors outfitted with decals such as "NO PARKING" are excellent choices for both permanent or temporary applications. The Wrap-It reflector is ideal for larger or odd shaped posts needing 360° reflective coverage.

FEATURES AND BENEFITS

- ▶ Made from the same durable plastic material as Safe-Hit's reboundable delineators. No more rusted and dented metal reflector devices.
- ▶ Colored Snap-It material appears uniform during the day, even if not completely covered with reflective material.
- ▶ Colored Snap-It material provides daytime visibility on Snap-Its that are minimally reflectorized.
- ▶ Greater reflectivity = greater visibility.
- ▶ Full 360° visibility
- ▶ Easiest and quickest installation of visibility enhancement reflectors:
 - No need for specialty fasteners and tools.
 - The Snap-It model literally snaps around most post types (especially U-Channel sign posts).
 - The Wrap-It reflectors wraps around posts allowing precise sizing of reflective to post.
